The following action is in response to the amendment received August 23, 2004.

***Allowable Subject Matter***

Claims 1, 4-9, and 11-16 are allowed.

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: Applicant's arguments set forth in the REMARKS filed August 23, 2004 (line 14 of page 7 to line 5 of page 11) are persuasive. Accordingly, the rejections based on 35 USC 102(a, b, and e) are withdrawn. In particular, the prior art of record fails to show or render obvious a rotating actuator as defined in claim 1 including an annular element having a pocket facing the shaft, the free end of the stop member engages the pocket, the pocket having first and second stops which form a slip range for the free end of the stop member to move within as the shaft rotates when the rotation of the annular element is blocked. The art of record also fails to show or teach the rotating actuator as defined in claim 9, including a stop arrangement acting mechanically on the shaft to prevent the shaft from rotating further in one of the directions of rotation while providing slip to allow rotation of the shaft in the other one of the directions of rotation, wherein the slip enables sufficient rotation of the shaft in the other one of the directions of rotation for detection by an angle detection device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Oath/Declaration***

The new Declaration received August 23, 2004 overcomes the previous objection to the Declaration. Accordingly, the objection is withdrawn.
